

SOLE S.A. is a pioneer in large centralized systems since 1974

Advantages

- Maximizes efficiency
- Rapid Heating
- Best aesthetic results
- Easy to install
- Compatible with all types of auxiliary heating
- Minimum maintenance needed
- Long durability

Commitment to the environment

Since its foundation in 1974 SOLE S.A. has been committed to the protection of the environment and the reduction of CO2 emission.

SOLE S.A. holds numerous prizes and environmental distinctions, contributing with its products to the environment in all 5 continents.

Solar Water Heating Systems

FCK
FORCED CIRCULATION KITS

FOR HOT WATER PRODUCTION BY SOLAR ENERGY

The new series of Forced Circulation Kits, have been designed in order to cope with the demands of any market all over the world, specializing in any application where hot water is demanded.

Durable
Withstanding 22,5 bar pressure!!!

EcoCollector

The EUROSTAR ECO collector casing is made of specially designed extruded aluminum profile, without any external connections, screws, nuts or rivets. The high density rockwool insulation will maintain very high temperatures achieving an incredibly high efficiency.

The absorber is composed of Blue Selective Aluminum fins of 0.50mm thickness, welded to copper pipes with laser welding.

The thermal liquid achieves maximum transfer of heat to the water while protecting the system against scaling, rusting, freezing and overheating.

Eurostar Floor Standing Tank

The EUROSTAR Floor Standing tank is made of low carbon steel with a double "enamelling" coating (glass), oven treated at 860°C.

The FREON FREE high density polyurethane insulation maintains hot water for many days.

The magnesium anode effectively protects the cylinder from electrolysis. The backup electric heater ensures hot water even in very cloudy days.

SOLE's Solar Systems are manufactured in compliance with the International Standards for Quality Assurance ISO 9001:2015.

The collector's performance and reliability is tested according to EN 12975-2 and has been granted with the Solar Keymark Certificate and TÜV Certificate for max pressure of 22,5 bar.

BOILER BODY	The boiler "body" is made from steel plate S235JR. The boiler is (glass) enamelled with the advanced double "direct" method "fired" at 860°C for tanks up to 2000ltr and epoxy resins for tanks larger than 2000ltr												
HEAT EXCHANGER	Internal heat exchanger made from Enamelled Steel or copper (depending on the size). Stainless steel heat exchanger also available.												
INSULATION	Freon free Polyurethane 50-100mm (40kg/m ³) casted under pressure or flexible (tanks larger than 500ltr).												
EXTERNAL COVER	Coloured PVC flexible jacket with zipper.												
ANODE PROTECTION	Magnesium rod.												
MAX. WORKING PRESSURE	6-10 bar upon request.												

BL1= Storage tank with 1 heat exchanger
BL2 = Storage tank with 2 heat exchangers
Optional electric element 2-24kW

CBL1 = Storage tanks with 1 removable heat exchanger
CBL2 = Storage tanks with 2 removable heat exchangers
